

Deleting passwords from browsers

This article will show you how to delete passwords from chrome and Edge once 1password is enabled.

1. When at the chrome home page (for Edge see below) click the 3 dots at the top right of the page and select 'Delete browsing data'.

2. Select the "advanced tab", specify range as "all-time", and only select the checkbox "passwords and other sign-in data" and select "delete data".

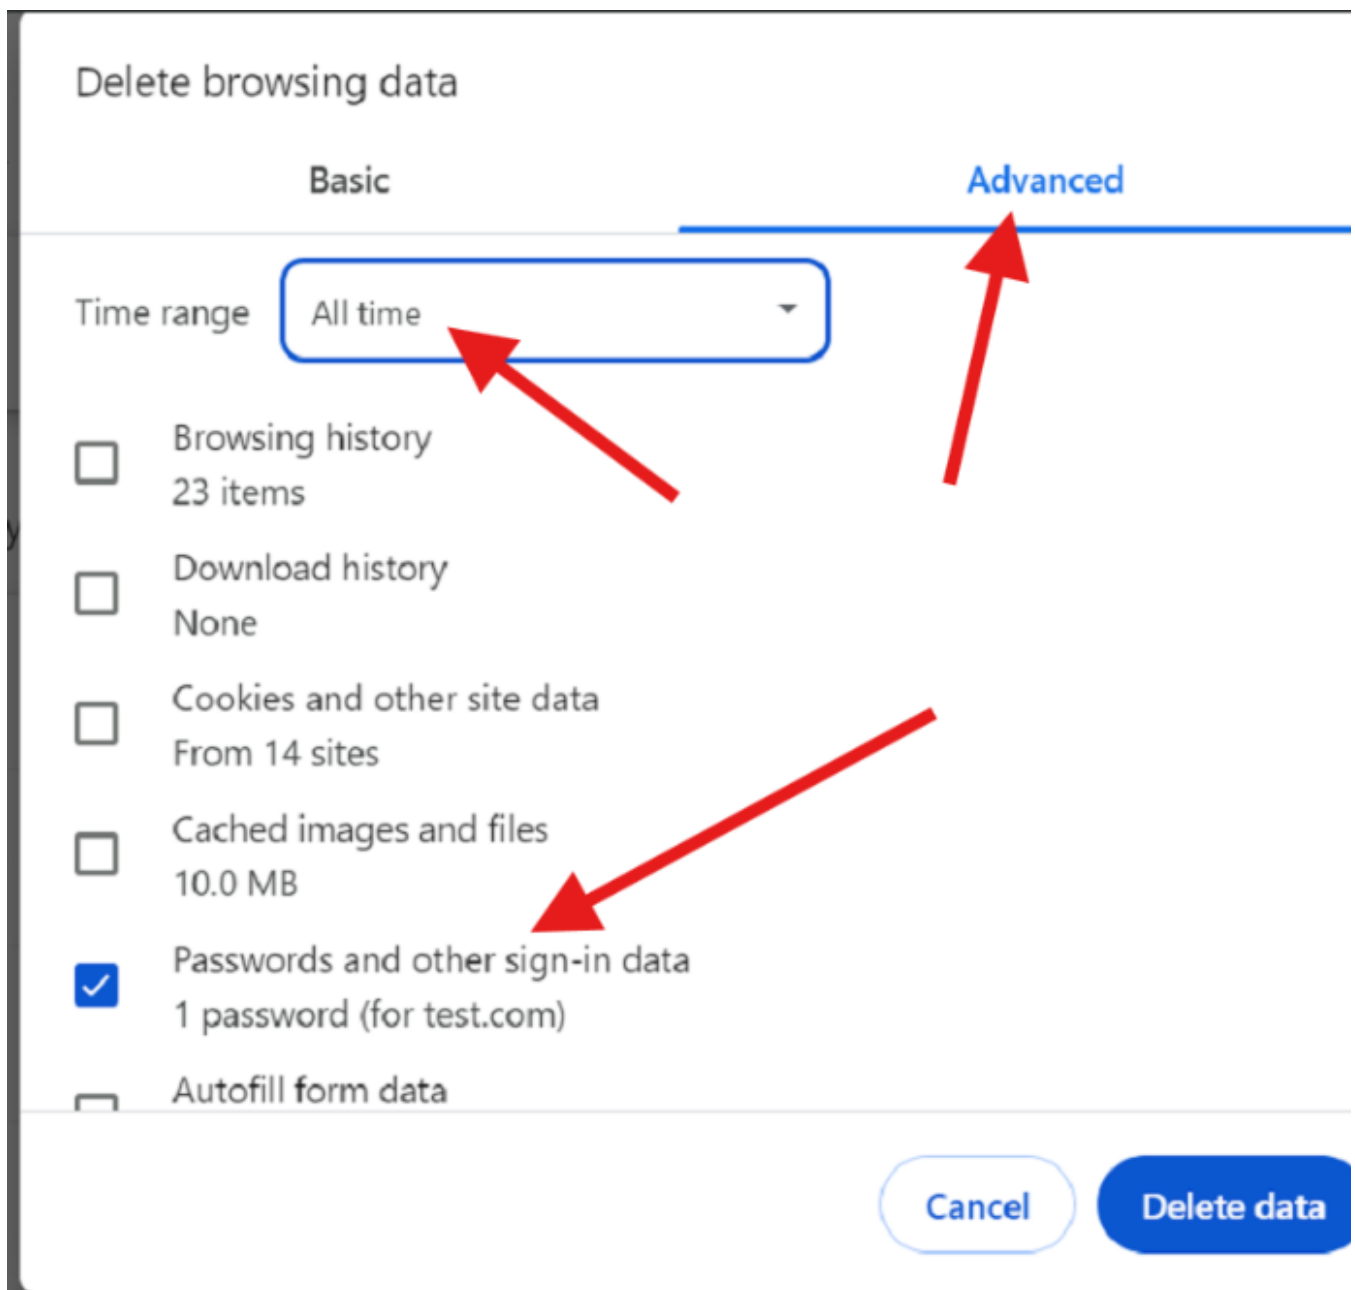

Delete browsing data

Basic **Advanced**

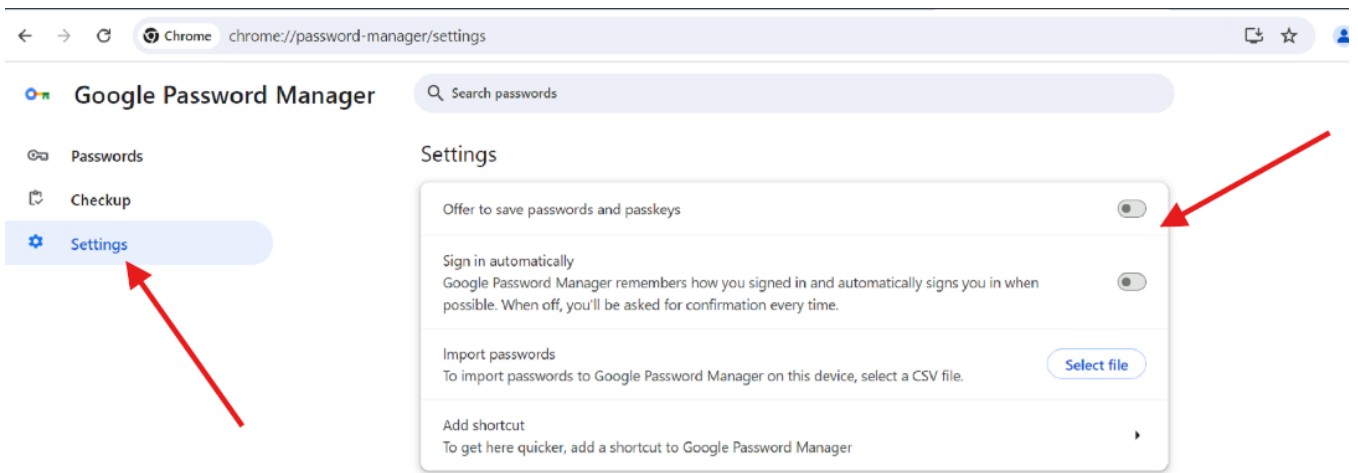

Time range: All time

- ☐ Browsing history
23 items
- ☐ Download history
None
- ☐ Cookies and other site data
From 14 sites
- ☐ Cached images and files
10.0 MB
- ☒ Passwords and other sign-in data
1 password (for test.com)
- ☐ Autofill form data

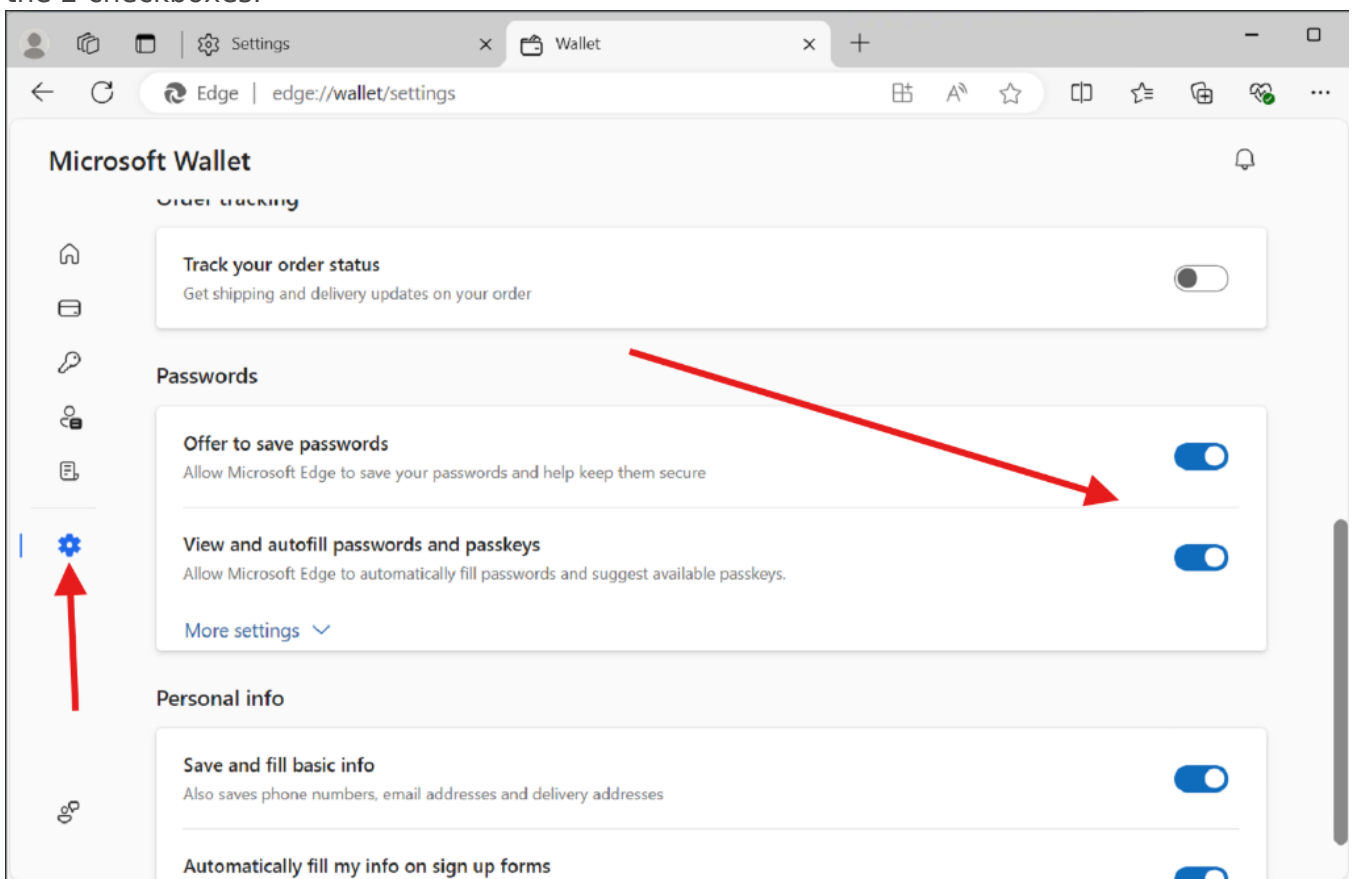

Cancel Delete data

3. Make sure to change the settings in chrome so passwords don't save anymore. Go to the same 3 dots (settings). Select "Passwords and autofill", then "google password manager".
4. Select the settings tab and uncheck these checkboxes.

5. For Edge. Select the 3 dots in the top right hand corner and select settings. Scroll down to passwords. Select the cog on the left hand side and scroll down to passwords and uncheck the 2 checkboxes.
