

# Edge Browser Extension - Management

Currently this is limited to IT Users via IT testing group within Intune.

Found under Device > Configuration there is a policy called Testing - Microsoft Edge Browser Extension Control.

This contains a wildcard blacklist of extensions with a whitelist of specific extension ids.  
This currently includes

1Password

UBlock Origin Lite

Grammarly; and

Scribe (Documentation creator)

The screenshot displays the Microsoft Intune management console. On the left is a navigation pane with options: Home, Dashboard, All services, Devices, Apps, Endpoint security, Reports, Users, Groups, Tenant administration, and Troubleshooting + support. The main content area shows the configuration profile 'Testing - Microsoft Edge Browser Extension Control' under the 'Home' tab. Below the title, there is a 'Delete' button. A section titled 'Device and user check-in status' features a green progress bar and a summary of status counts: 7 Succeeded, 0 Error, 0 Conflict, 0 Not applicable, and 0 In Progress. A 'View report' button is located below these counts. Two informational boxes are present: 'Device assignment status' explaining that the report shows devices targeted by the policy, including those in a pending state, and 'Per setting status' explaining that it shows the configuration status of each setting across all devices and users. At the bottom, the 'Properties' section is visible, with a 'Basics' tab selected, showing the profile name 'Testing - Microsoft Edge Browser Extension Control', description 'Extension Whitelisting for Edge', and platform 'Windows'.
