

Setup Employment Hero iPad

Onboard the iPad into Intune by following this article <https://bookstack.pbr.org.au/books/ios-devices-intune/page/onboarding-ios-devices-into-intune>

Add the iPad to the following enrollment profile

- **PBR iPad Profile** - This is for iPads running Survey Legend, Better Impact or Employment Hero

Once you get to the home screen, the following settings need to be set manually -

- Set brightness to max
 - Go to Settings > Display & Brightness
- You may also have to allow the camera for the employment hero app.

Next step is to add the iPad to the **Intune_iOS_Wifi** Group. Its important to do this and ensure it is working before putting into Kiosk mode, as you can lock yourself out of the iPad. The best way to check the WiFi policy has been applied is go to Settings, Wi-Fi click on the connected wifi network 'internet' and see if the option to 'Forget This Network' is available . If this option is not available then the policy is applied.

Now you need to remove the passcode set earlier, Intune | Devices | select the device and click 'remove passcode'

Now you need to assign the device to the **Intune_iPads_EH** AAD group. This will enable Kiosk Mode

Once iPad is in Kiosk Mode, you just need to logon to Employment Hero

Summary Of Applied Profiles & Policies for Employment Hero iPads

Enrollment Profile

- PBR iPad Profile
