# How to: Live Page (Training)

Live Paging

If the paging announcement is for the standard areas you can press the button the microphone and talk.

If you need to change what areas the announcement is going to please keep reading.

1. If you want to change the areas for a live announcement you can click on the tab open the top right hand corner of the screen.

2. You can then select what zone you would like to deploy the announcement. If you select "select all", it will deploy the announcement to all zones.

3. Once the zone is selected you can push and hold the talk button on the microphone to talk and deploy the live page.
