

Signing In to 1password

1. To sign in on the app, click "sign in" > "Enter account details". Enter the users email address with the sign-in address as below and hit next. You will need to authenticate with duo.

← Sign In ×

Email address

test.it@volunteer.pbr.org.au

Sign-in address

puffingbillyrailway . 1password.eu ▼

Check your "Welcome to 1Password" email.
[Or find it in your Emergency Kit.](#)

Next

2. 1password will then ask to trust the device. You will need to input a code. Go back to the web portal where it will ask you to allow or deny the device. Once allowed it will give you a code to enter in the app version. Once completed the app can then trust the device and the app version can be used.

Allow new device?

ETRB181001L near Melbourne, AustraliaAU is trying to use your account

If this isn't you, deny the request, then contact your team administrator.

3. The web browser extension can also be installed from the app. Click the 3 dots and select settings.

4. Select "Browser" and "Get 1Password for Your Browser" (If the link does not work, copy the link and paste it into a new tab)

5. Select "Get" and "Add Extension"

6. Make sure to delete passwords from the browser and disable and browser settings. If you need to import existing passwords from chrome or edge, see bookstack
