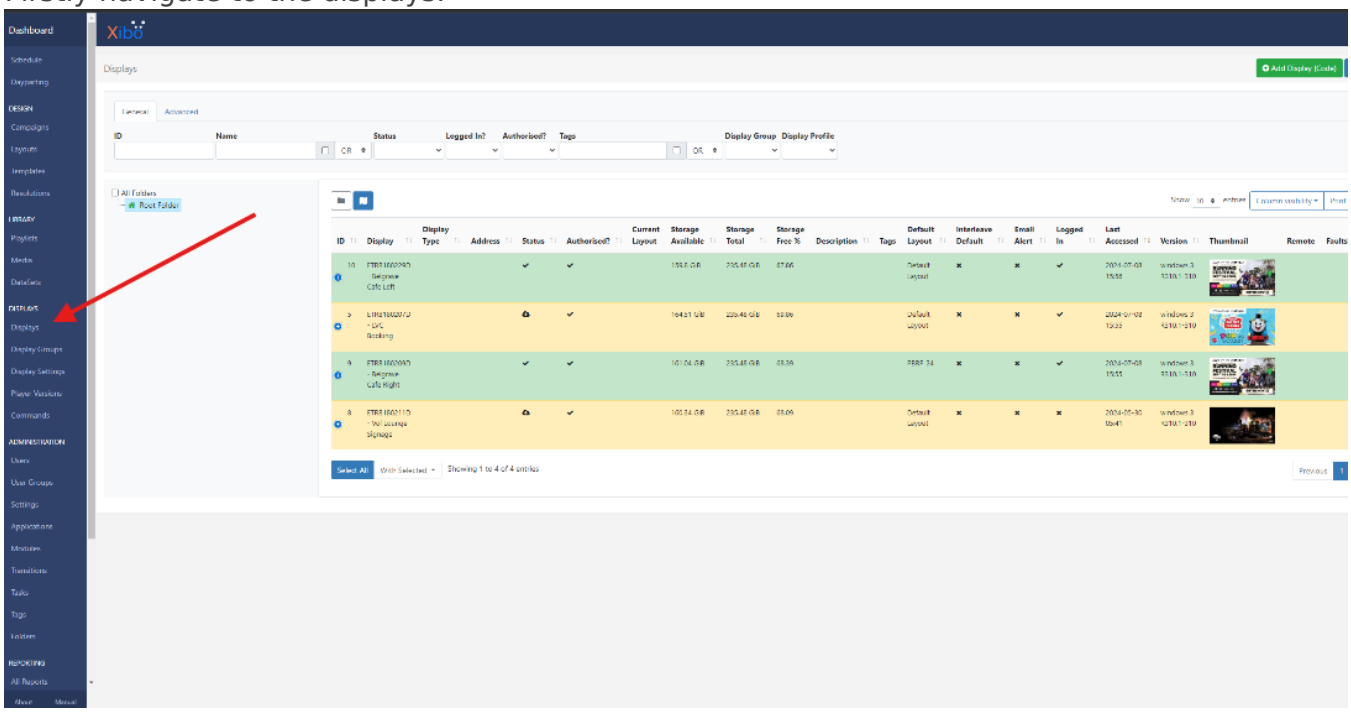
Image Change

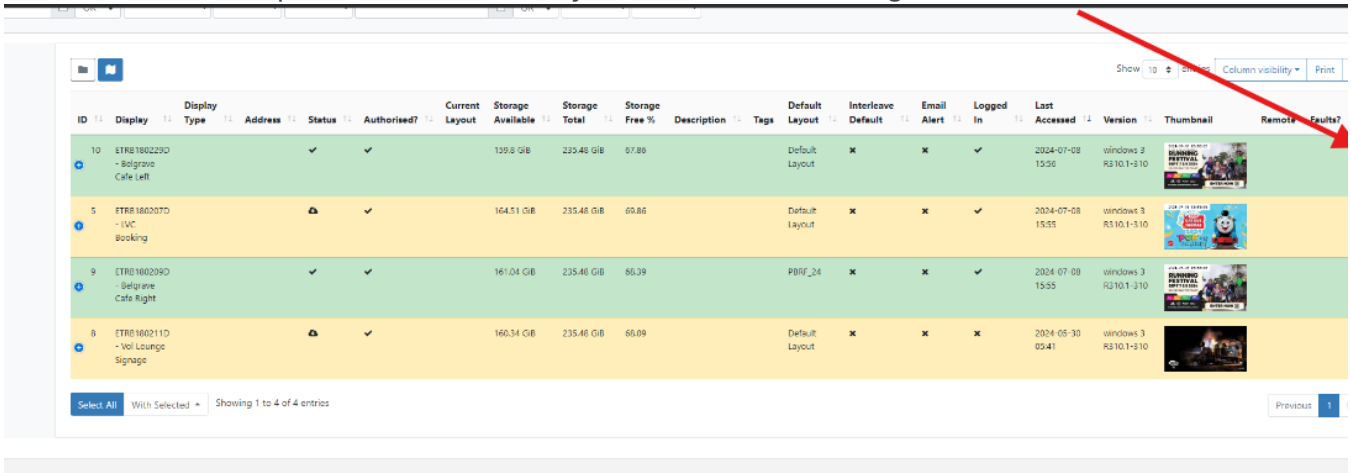
This article is for if you would like to change an image on a device in Xibo.

Creds in 1pass.

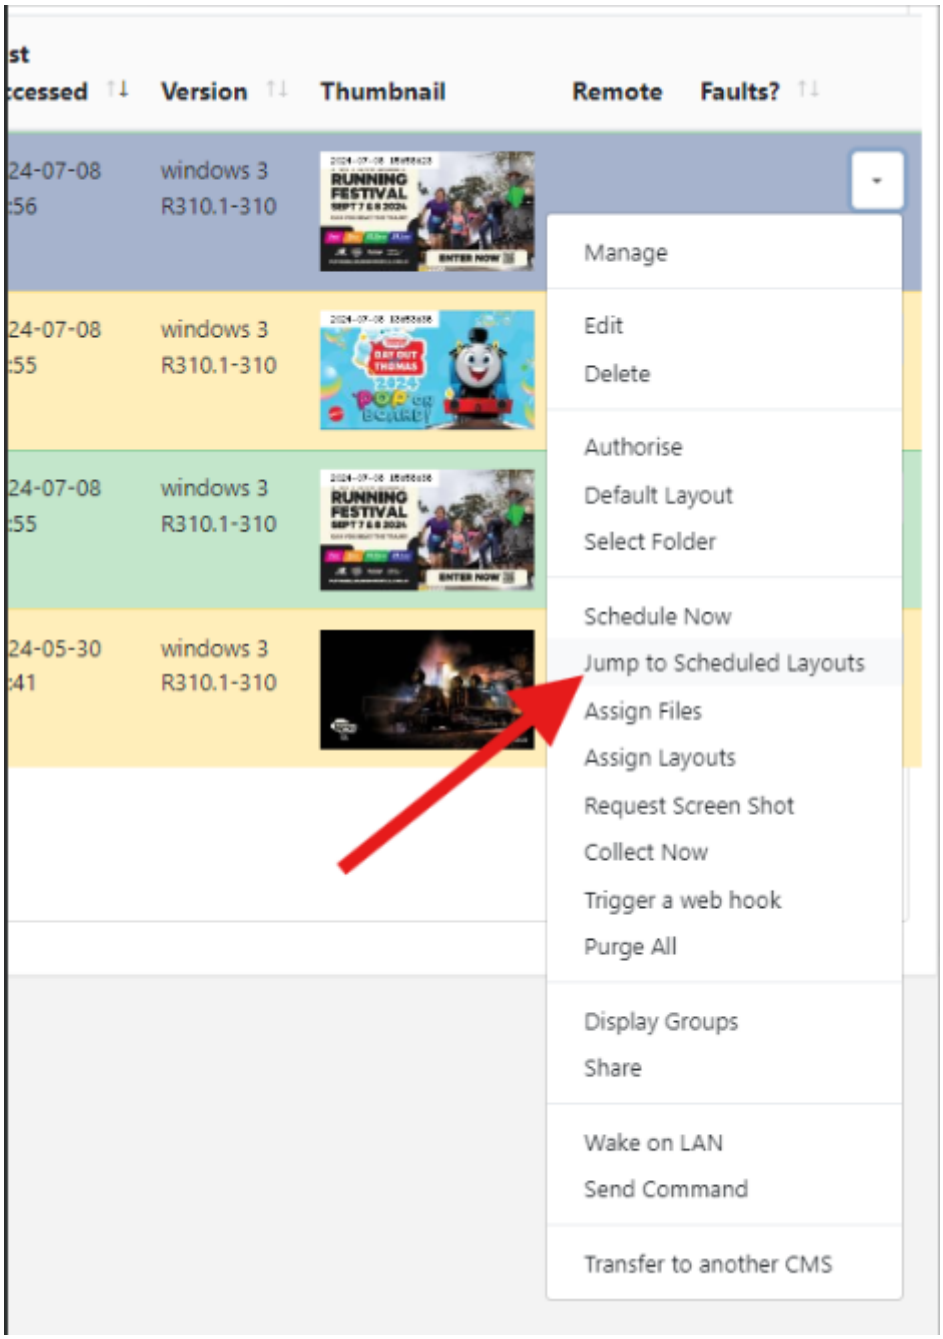
1. Firstly navigate to the displays.



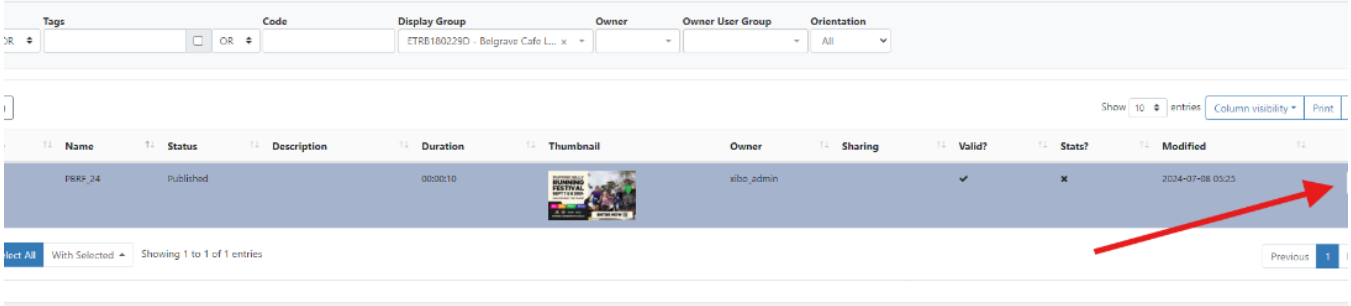
2. Then select the dropdown of the device you would like to change.



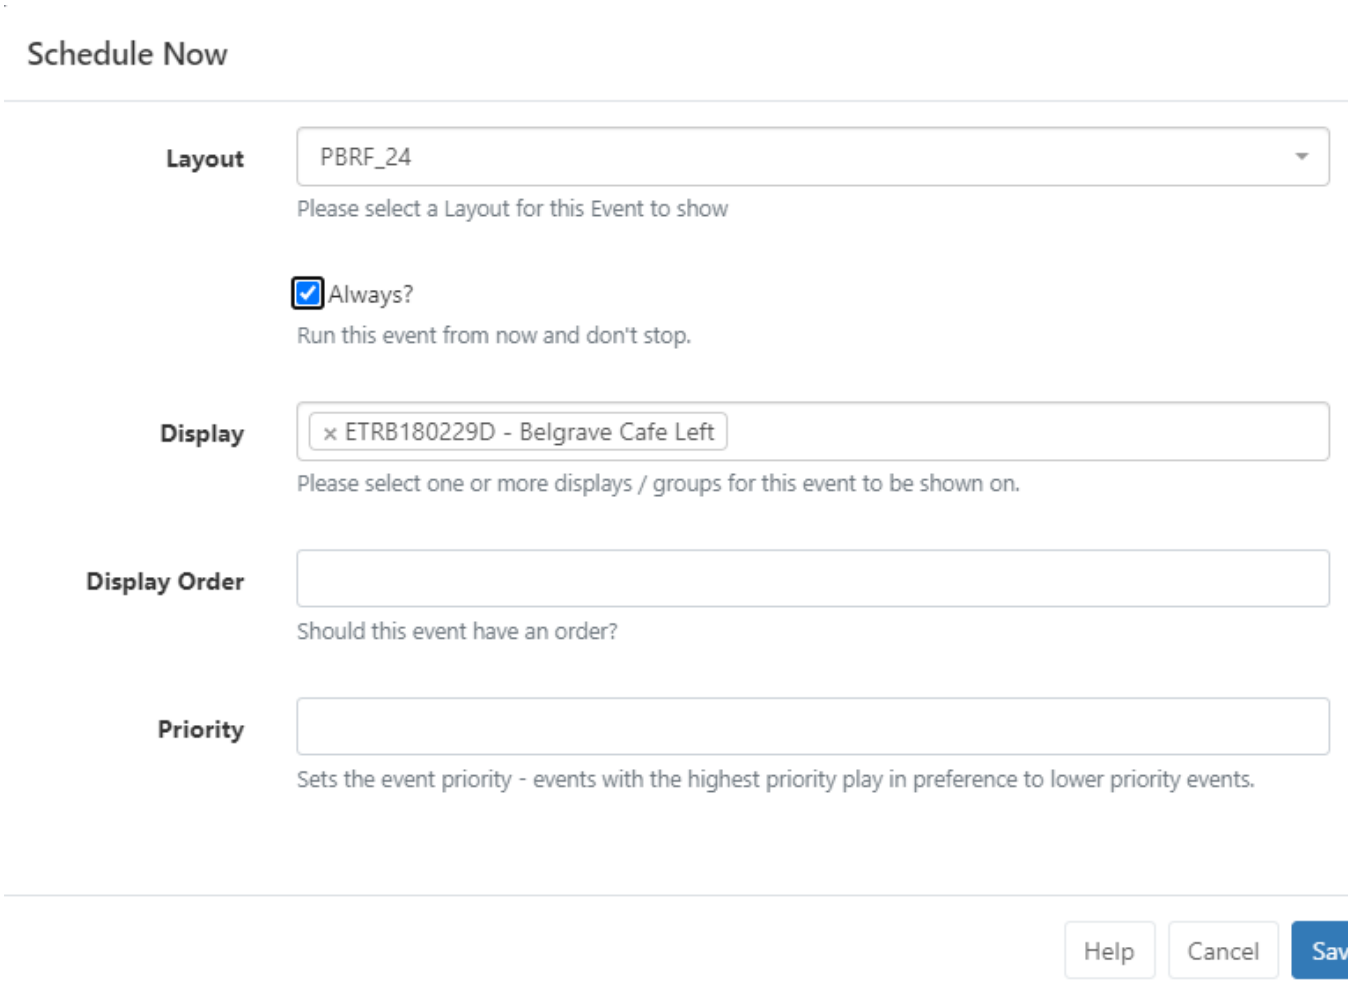
3. Select "jump to scheduled layouts".



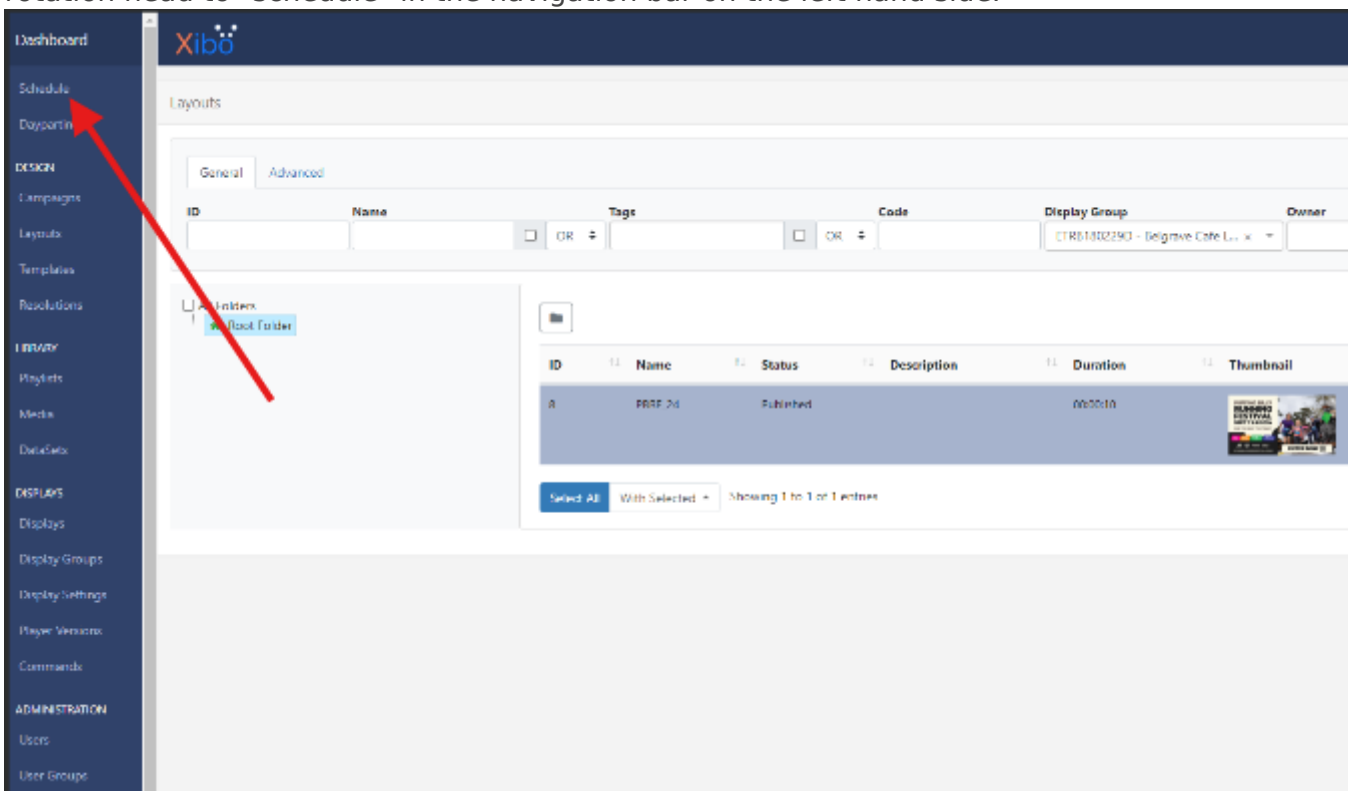
4. Select the dropdown of any row and select "schedule now".



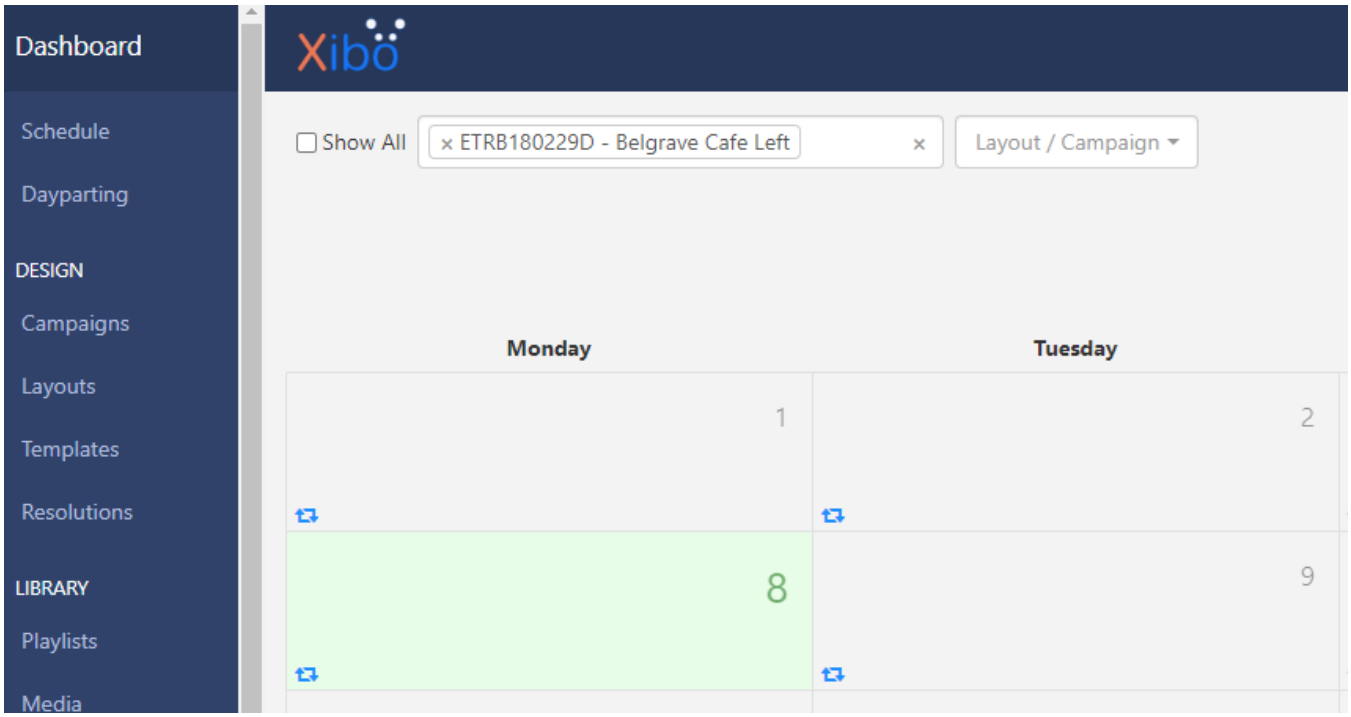
5. Select the layout (image) you would like to display. Check the checkbox "Always?" and select your display, click save.



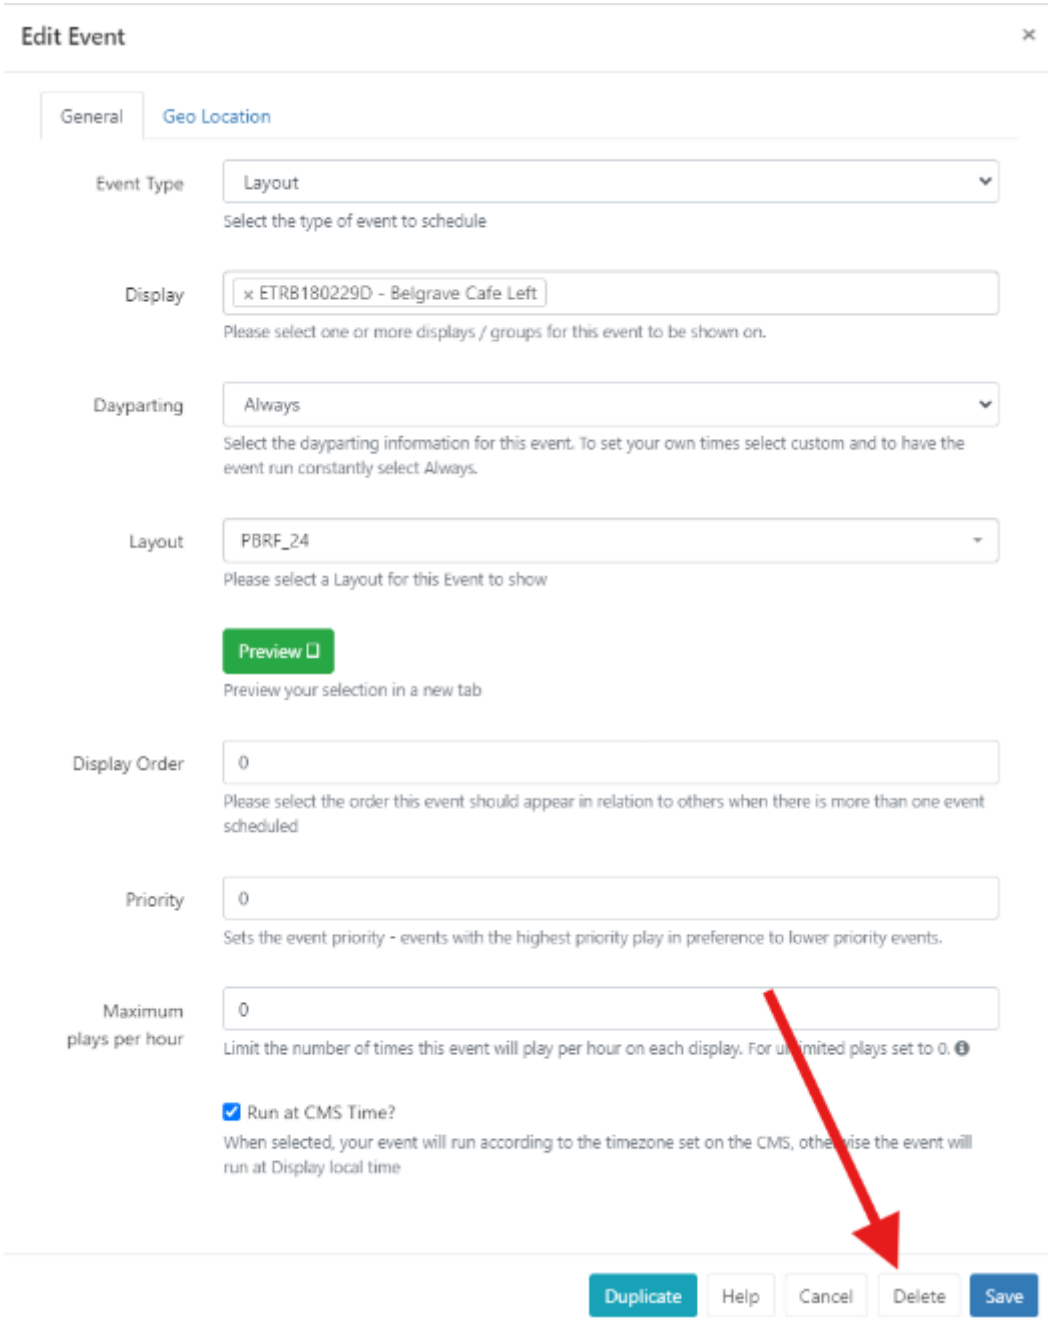
6. You will now have at least 2 rows and the image will rotate between them. To stop the rotation head to "schedule" in the navigation bar on the left hand side.



7. Select your display and choose any date.



8. Select the unwanted layout to open it up. Click delete.



The image you selected should now be a static image.
